

THE PROTECTION OF OUR ENVIRONMENT is a major concern for SONCEBOZ.

We want to preserve the natural environment dedicating particular attention to the local situation at Sonceboz: in the heart of the Swiss Jura, close to the natural park of Chasseral.

In order to attain this objective, SONCEBOZ has chosen a both pro-active and systematic approach. This approach is based upon an environmental management system that is compliant with the ISO 14001 standard.

The board of directors is committed to the integration of environmental protection in their management practice, taking into account the following aspects:

- Legal requirements and the laws in force are respected
- Guarantee the reduction of environmental impacts, as well as the minimal usage of resources through a process of continuous improvement, guided by objectives
- Both develop and apply an index system that describes the most significant environmental aspects in order to measure the progress that has been made
- Raise in each individual member of the company's work force the awareness of their personal involvement in the environmental protection effort
- Evaluate and permanently reduce potential environmental risks in order to prevent accidents and reduce their impact in case they occur
- Act in partnership with the appropriate authorities
- Take into consideration the expectations of all concerned parties, and strive to satisfy them
- Involve suppliers in the effort to reduce environmental impacts

Our core competencies consist of design, development and production of mechatronic drive systems and electric motors that operate in harsh environments. We are committed to improving safety, decreasing energy consumption and minimizing the impact on the environment. Our focus on innovation, best in class quality and exceptional service is our key to success for worldwide OEM customers and their suppliers.
